**MSQ.MFO 型电流互感器****MSQ.MFO Current transformer****概述 Description**

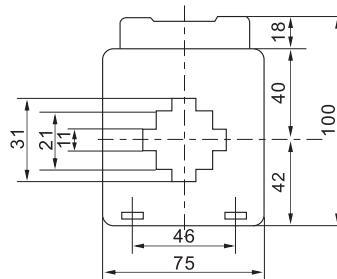

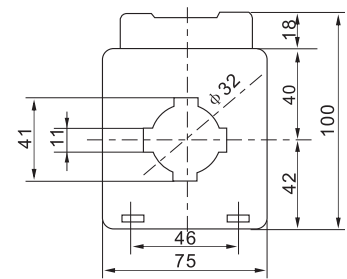

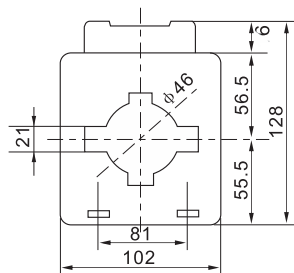

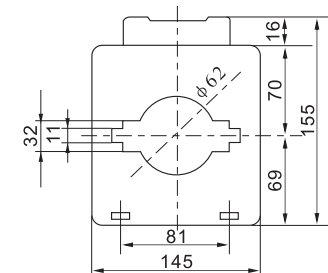

本型电流互感器适用于额定频率为50Hz或60Hz、额定电压为0.66kV及以下的电力系统中，作电能计量、电流测量和继电保护用。

The current transformer is used for measuring electric energy and current, relay protection in the electric system up to rated frequency 50Hz or 60Hz and rated voltage 0.66kV.

结构简介 Construction

本型电流互感器为母线型塑料壳式绝缘，产品下部有安装板供固定安装用，中间窗孔供一次母线通过用。

The iron core is loop type. The secondary winding go uniformity around the core. There has hole for the busbar going through on the nip.
